Task 2. Download any official Linux distribution iso (Ubuntu) and use Rufus or BalenaEtcher to create a bootable USB drive for installation.

→ What you need:

- A USB flash drive (8GB). Backup any important data on it, as it will be completely erased.
- A Linux ISO file (Ubuntu / Fedora)
- Flashing software : Rufus or balenaEtcher.

★ Steps :-

1. Plug in USB drive
2. Open Flashing tool.
3. Select target drive
4. Flash USB drive (start drive)

★ For

Task 3. on a macOS device open system preferences and change the desktop wallpaper then adjust the system language to Hindi or Gujarati.

→ 1. open System Settings / preferences

Click on apple icon on top left on screen and select system setting.

2. change desktop wallpaper :-

Scroll down the leftside & click on wallpaper apply it immediately.

3. Navigate to language & Region :-

click on general left sidebar then select language & Region.

4. Add Hindi / Gujarati :-

Under preferred given language click on + button. Type for Hindi & Gujarati select from list click it and add.

5. Set as primary language :-

When prompted choose to use your new language as primary language Restart your mac to complete its changes.

* For virtual machine :-

If you are running macos inside virtual box or vmware make sure to install Guest Additions / Tools so screen resizing and wallpaper display function smoothly.

Task 4. Install a fresh copy of Ubuntu Linux and create a new user account named 'games'. After installation enable automatic login for this user and take a screenshot of the login screen showing the username.

→ create user 'games'.

(1) open setting > users click unlock.

(2) click Add user, set name to games and add.

Enable Auto-login:

Toggle Automatic login to ON for games.

Task 5. Use chatGPT to generate a step by step guide for installing windows 10 on a laptop, including partitioning tips & post installation settings for privacy & updates. Follow the guide and note any steps that were unclear or missing.

→ 1. Boot from USB :-

- Plug in windows 10 USB.
- Turn on laptop Fast Press F12 key open bootm.
- Select USB drive for start.

2. Start install :-

- click install now
- Then click click I don't have product key.
- choose custom

3. partition the drive :-

- Easy way :- delete all partitions click next
- split drive :- click new, type MB for C drive and click apply. Install window on primary partition.

4. privacy setting :-

- Disconnect wi-fi and choose offline account to skip microsoft login.
- Turn off all tracking switches like location, Advertising ID, Diagnostic data.

5. Post-Install update :-

- go to setting → Update & security → Windows Update
- click check for updates to grab essential drivers

* missing / unclear :-

- * Drive not showing up? Newer laptops often need Intel RST drivers copied onto the USB so Windows can detect the hard drive.
- * Boot keys vary :- different laptop brands use different keys (F2, F12, Del or Esc) to open the boot menu.
