

Assignment Day-4

Page No.

Date

1. connect a USB webcam to your computer, install any required drivers and verify that the webcam works by opening the default camera app and capturing a photo.

task 2. Set up a local printer (USB or Network) install the correct driver, and print a test page to confirm successful installation.

→ 1. plug in / connect

2. Add the printer to your computer

3. Install standard / manufacturer drivers.

In almost cases windows / mac will download & install the right driver in background within seconds.

If computer not recognise the printer, go to printer manufacturer's website (like HP, Canon, Brother) search exact printer model under their driver section and download recommended software package.

4. print a test page.

task 3. Simulate a connectivity issue by unplugging the printer's USB cable, then use windows device manager to identify and resolve the 'printer not detected' problem

→ 1. simulate the disconnection (break connection)

Unplug Printer USB from computer. computer will lose connection to the device.

2. open device manager and spot issue

check status in windows

3. Reconnect printer cable :-

plug printer's USB cable back into computer's USB port. check printer is turned on.

4. Scan for hardware changes :

Force window to detect it.

Q4

4. A user reports that their webcam video is not displaying in zoom, but it works in the default camera app. Troubleshoot and resolve the issue so the webcam works in both applications.

→

1. Close Background applications
2. Check operating system privacy settings.
(check zoom has permission to access the webcam)
3. Verify zoom In-app video settings
4. Adjust Advanced video settings
