Date

task

1. List 5 common issues users face with USB Keyboard or mice on laptop, and write one possible solution for each.

→

1. Not responding / disconnected :-

Solution :- unplugging the USB cable wait 5 second and plug it back.

2. Lag / delayed typing :-

Solution :- For wireless devices move receiver closer, replace batteries or turn-off power saving mode for USB port in device manager.

3. Wrong keys typing / erratic cursor :-

Solution :- Clean keyboard or mouse to remove dust, and verify keyboard language layout settings.

4. USB port or device drive errors :-

Solution :- Open device manager, locate keyboard / mouse under keyboard or mice, right click it select uninstall device, then restarts laptop.

5. Interference on 2.4 GHz wireless device :-

Solution :- move wireless receiver away from USB 3.0 ports, or Wi-Fi routers using a short USB extension cable.

Task 2. Simulate a troubleshooting flow:- your Bluetooth headphones are not connecting to your phone. write the exact step by step actions you would take to diagnose and fix the issue, mentioning any settings or indicators you would check.

→

1. Check power & Battery
2. Enable Bluetooth & discovery mode.
3. clear conflicts & Re-pair
4. Restart Devices or Reset Headphones

Task 3. A user reports that their external webcam is not detected during a zoom call on windows 10. write a checklist of 6 things to check or try to resolve the problem.

→

* check USB cable and USB port :-

Unplug the webcam, wait 5 seconds and plug it directly into a different USB port.

* Verify windows camera privacy settings :-

Go to Setting > privacy > camera, make sure Allow apps to access your camera is turned on.

Date ____/____/____

Scroll down to ensure allow desktop apps to access your camera is also toggled on.

* check zoom in-app setting :-

open zoom, click on your profile go to Setting > video, and ensure the correct external webcam is selected in the camera dropdown list.

* inspect device managers for errors :-

Right click the start menu, select device managers expand camera and check if webcam has a yellow warning icon. If it does, right click it and select update drivers or uninstall device then restart PC.

* close other apps using the camera :-

close background programs like microsoft teams, Skype, webex that might be locking the webcam stream.

* check physical privacy shutter and software toggles :-

Ensure the webcam's physical lens slider is open and press any dedicated camera privacy key on your keyboard (F5, F10) to ensure it isn't hardware disabled.

Task 4. you are helping a friend whose printer is showing 'offline' status on their pc. describe how you would use the windows troubleshooter tool to try to fix the issue, and explain what information the tool provides during the process.

→ 1. How to run the windows troubleshooter :-

- open setting then click update & security.
- select troubleshoot from left menu, then click additional troubleshooters.
- click on printer and select Run the troubleshooter.
- select your offline printer from the list and click Next to let windows scan it.

2. information the tool provides during process :-

- check status & connections :-

verifies printer power on, physically connect via USB or reachable over your wi-fi network.

- inspects background services :-

It scan Print Spooler Service (the software that handles print jobs) to see if it is frozen or stopped and automatically tries to restart it.

- clear stuck jobs :-

detects any old documents are stuck in the queue blocking new prints and offers to clear them.

- checks driver errors :-

It identifies missing, outdated or corrupted printer drivers.

- gives a final report :-

once finished, it displays a summary telling you either Fixed or Issue found.
