Day 1.

Task 1. Create a table listing 3 types of printers, 2 types of scanners and 2 types of webcam and for each write one real-life use case.

Category	Device Type	Real-life use case
printer	Inkjet printer	printing colorful photos & school projects at home.
printer	Laser printer	Fast printing of large stacks of black & white office documents.
printer	Thermal printer	Instantly printing sales receipt at grocery stores and checkout counters.
Scanner	Flatbed Scanner	Scanning physical photos or delicate book pages into a computer.
Scanner	Document Feeder (ADF) Scanner	Rapidly digitizing a multi-page stack of paper contracts for work.
webcam	Built in Laptop webcam	joining everyday video calls and online classes on the go.
webcam	External USB webcam	Streaming video games or recording high-quality videos for social media.

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi or Bluetooth).

HOW A HOME PRINTER CONNECTS TO A LAPTOP OR PC

3. List three different connection interfaces (such as USB, wifi, Bluetooth) used by peripherals like printers, scanners and webcams and for each name one advantage and one disadvantage.

→

1.

USB (wired connection)

Advantage

- Fast & stable connection
with zero lag or interference

Disadvantage

cable length limits
where you can place
your device, and it
creates desk clutter.

2.

wifi (wireless connection)

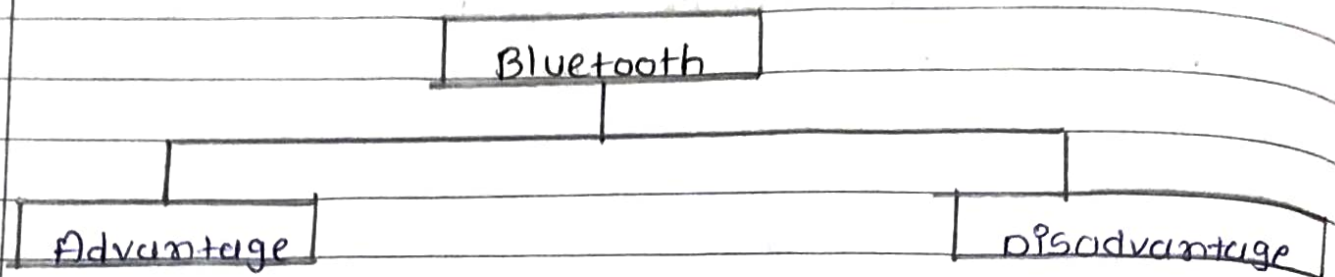

Advantage

Lets multiple devices
like phone, laptop etc.
use the peripheral from
anywhere in the house
without cables.

Disadvantage

can disconnect or
slow down if the
wifi signal is weak
or network traffic
is heavy.

3. Bluetooth (short-range wireless)

Quick & easy to set up without needing a wifi router or extra cables.

Has a short range usually around 30 feet and transfers data slower than wifi or USB.

Task 4. pick any one device you use at home or college (printer, scanner or webcam). write step by step instruction for how would connect it to your computer including what cable or wireless method you would use and any setup steps required.

→ For wifi printers :-

1. Power on the printer :-

plug the printer into a power outlet and press the power button.

2. Connect printer to wi-fi :-

Use the printer's touchscreen or button menu to select wi-fi setup, choose your home network, and enter the wi-fi password.

3. Open printer settings on computer :-

on your computer, go to settings → devices → printers & scanners (or system setting → printer on mac).

4. Add the printer :-

Click Add printer or +. your computer will scan the network, find your printer, and install the necessary drivers automatically.
